

☆ It is the
supreme art
of the teacher
to awaken
joy in
creative expression
and
knowledge.

- Albert Einstein

Best. Profession. Ever.

Teachers are the  **#1**  school-based factor influencing student achievement. 

**TEACHER
SUPPORT**

— AND —

**RELATIONSHIP
QUALITY**

— ARE KEY FOR —

**ENGAGEMENT
AND
PERFORMANCE**

A photograph of a classroom. A male teacher in a light-colored polo shirt and grey trousers stands on the right, gesturing with his hands while holding a piece of paper. He is facing a group of students seated at desks. In the background, there are whiteboards with handwritten notes, a red paper lantern hanging from the ceiling, and a decorative border featuring cartoon characters. The text 'TEACHERS STAY WHERE THEY FEEL SUPPORTED.' is overlaid on the left side of the image in a large, bold, sans-serif font. 'TEACHERS', 'WHERE THEY', and 'FEEL' are in dark blue, while 'STAY' and 'SUPPORTED.' are in a vibrant green. A small green heart icon is positioned below the main text.

**TEACHERS
STAY
WHERE THEY
FEEL
SUPPORTED.**

LEADERSHIP MATTERS.

When
teacher
optimism
— spreads, —
students
learn.

Cause & Effect
as
What is a Cause + effect?
What caused _____?
What effected _____?
How did _____ effect _____?
What was Yaw (several reason/effect)?
How did the cause effect the story?
(Cause) _____ (reasons) _____
_____ effected _____
_____ cause _____

Sequencing
What is the sequence?
(order of happenings or color)
What happened first?
What happened second?
What happened after?
What happened last?
What is the most important?
What happened before?
What was the first cause?
What happened last?
What did the cause effect you?

Sequencing Words
First (second last...), Last, Before
Next, Then, Finally, Later, Extra last
Recently... after the sequence time they
... with the most important event made...

THE ART AND SCIENCE OF TEACHING READING

"We believe that teachers with a solid understanding of the SOR should absolutely modify, adapt, and innovate to move the field forward and improve student reading."

Paige, Young, Rasinski, Rupley, Nichols, and Valerio, 2022

A bit on phonics, vocabulary, and morphology followed by more confidence building fluency development approaches for teachers and families.

Some Research on Phonics

Analytic Phonics (d = 0.34)

An analytic approach teaches students to blend the onset and rime into a word using word families (NRP, 2000).

 c	at	 r	at
 h	at	 b	at
 m	at	 f	at

More Research on Phonics

Synthetic Phonics ($d = 0.45$)

A synthetic approach teaches students to convert letters into sounds and then blend those sounds to make a word (NRP, 2000).

(Christensen & Bowey, 2005; de Graaf, Bosman, Hasselman, & Verhoeven, 2009; Johnston, McCeown, & Watson, 2012; NRP, 2000).

PHONICS: MAKING IT ARTFUL

- Make it engaging
- Dare I say make it fun?
- Make it meaningful by giving a purpose

Planet → **CLUE**: A vehicle that flies in the sky. Take away 1 letter.

Assessment

What specific phonics instruction do they need?

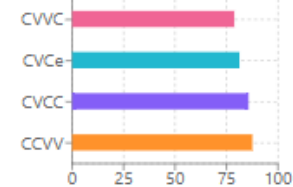

word complexity increases. This suggests phonological working memory challenges affecting longer words.

Recommendations:

1. **Systematic Phonics Intervention:** Focus on consonant blend drills using the Orton-Gillingham approach, particularly targeting SW, FL, and SN combinations. Practice with word families and minimal pairs can strengthen these weak patterns.
2. **Syllable Segmentation Training:** Implement explicit syllable division instruction using techniques like syllable counting, clapping, and visual segmentation. The Wilson Reading System provides structured approaches for multi-syllabic word attack strategies.
3. **R-Controlled Vowel Practice:** Use systematic practice with "or," "er," and "ir" patterns through structured word sorts and reading exercises, as outlined in Words Their Way methodology.
4. **Invented Word Strategy Development:** Since this text contains nonsense words, explicitly teach morphemic analysis and flexible decoding strategies to help with unfamiliar vocabulary.

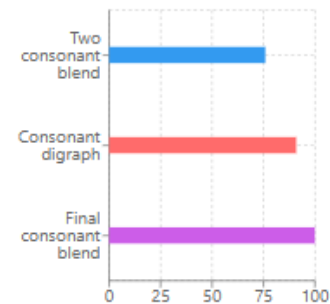

Consider implementing **repeated reading exercises** with phonetically controlled texts to build automaticity with these challenging patterns, and ensure adequate **phonological awareness** foundation through sound manipulation activities.

Practice -IR

Introduce the sounds verbally.

Show the letter(s) in isolation and students read chorally several times.

Write the letter(s) in isolation (white boards, paper, fingerpaint, etc) and read chorally several times.

Show the letter(s) in the context of a word and read chorally several times.

Write the letter(s) in the context of a word and read chorally several times.

Blend the word.

Segment the word _____ and count the phonemes.

Engage the students in elisions:

- What would the word _____ sound like without the /1st/ sound?
- What would the word _____ sound like without the /2nd/ sound?
- What would the word _____ sound like without the /Xth/ sound?

Finally, draw an interpretive picture that represents the letter sound relationship to spoken language.

R-Controlled Tongue Twisters

Generate **ir** words:

- First
- Dirt
- Dirty
- Shirt
- Skirt
- Flirt
- Swirl
- Twirl
- Whirl
- Girl
- Bird
- Chirp

The first twirly bird chirps in a dirty shirt

The first twirly bird chirps in a dirty shirt

The first twirly bird chirps in a dirty shirt

Scary Stories and Silent Letters (digraphs)

- Teach common silent letter combination digraph **MB**
- From list, pick **MB** words that might work well in a scary story, such as
 - **climb**, **lamb**, **numb**, **tomb**
- With your students, write a short scary story about a silent ghost (or zombie or whatever)
- Make copies for the students so each can illustrate it
- Act it out

In the moonlit cemetery, young Lily the Lamb dared to explore the ancient tomb. Inside, a chilling moan made her numb with fear. As she tried to climb out, a skeletal hand grasped her ankle, pulling her into the darkness below.

Would You Rather?

...live the rest of your life
without toothpaste or
shampoo?

Generate Some CVC/CVCe Words

CVC	CVCe
cap	cape
hop	hope
kit	kite
mad	made

Cap/Cape

Would you rather wear a **cap** full of barf or a **cape** made of fingernail clippings?

Mad/Made

Would you rather play with **mad** bees or eat a sandwich **made** by hands covered in snot?

Putative Kappa Opioid Heteromers As Targets for Developing Analgesics Free of Adverse Effects

- It is now generally recognized that upon activation by an agonist, β -arrestin associates with G protein-coupled receptors and acts as a scaffold in creating a diverse signaling network that could lead to adverse effects. As an approach to reducing side effects associated with κ opioid agonists, a series of β -naltrexamides 3-10 was synthesized in an effort to selectively target putative κ opioid heteromers without recruiting β -arrestin upon activation. The most potent derivative 3 (INTA) strongly activated KOR-DOR and KOR-MOR heteromers in HEK293 cells. In vivo studies revealed 3 to produce potent antinociception, which, when taken together with antagonism data, was consistent with the activation of both heteromers. 3 was devoid of tolerance, dependence, and showed no aversive effect in the conditioned place preference assay. As immunofluorescence studies indicated no recruitment of β -arrestin2 to membranes in coexpressed KOR-DOR cells, this study suggests that targeting of specific putative heteromers has the potential to identify leads for analgesics devoid of adverse effects.

Some Research

- **Vocabulary is deeply connected to reading comprehension.**
- *Research shows that vocabulary knowledge is one of the strongest predictors of reading comprehension across all grade levels.*
(National Reading Panel, 2000; Snow, 2002)

More Research

- **Students need multiple exposures to a word.**
- *Just seeing a word once isn't enough. Students often need 12+ meaningful encounters with a word in different contexts to truly learn it.*
(Stahl, 2005)

And More!

- **Explicit instruction works but it's not enough alone.**
- *Teaching specific words directly helps, but the biggest gains come when it's combined with word-learning strategies and rich oral language experiences.*
(Beck, McKeown, & Kucan, 2002)

But Wait, There's More!

- **Teaching morphology boosts vocabulary and reading.**
- *Students who understand prefixes, suffixes, and roots can figure out the meaning of unfamiliar words more easily—especially in upper grades.*
(Bowers, Kirby, & Deacon, 2010)

What? Even more?

- **Wide reading builds vocabulary naturally.**
- *The more students read, the more words they encounter—especially if they read a variety of genres and texts.*
(Cunningham & Stanovich, 1998)

No way!

- **Interactive, engaging methods work best.**
- *Activities like word sorts, semantic mapping, games, and student-generated definitions lead to better retention than copying definitions.*
(Graves, 2006)

The Power of Vocabulary

<u>Stage</u>	<u>Strongest Predictors</u>
Preschool	Oral language, vocabulary, phonological awareness
Kindergarten	Alphabet knowledge, phoneme awareness, rapid naming
Grades 1–2	Decoding accuracy, phonics, word reading
Grades 3–5	Vocabulary, background knowledge, language comprehension
Middle School+	Academic language, knowledge, inferencing, comprehension monitoring

Teaching Words

Dictionary definitions are rarely helpful for students

Instead use student-friendly, culturally relevant explanations of word meanings (synonyms are especially helpful)

You Try! – Kid-Friendly Definitions

How Many Words? (50%ile)

Grade		Approximate Words Known
Kindergarten		5,000–10,000
Grade 1		8,000–12,000
Grade 2		10,000–15,000
Grade 3	8–10 words per day 60–70 words per week 1 new word every waking hour	13,000–20,000
Grade 4		17,000–25,000
Grade 5		20,000–30,000
Grade 6		25,000–35,000
Grade 8		35,000–45,000
Grade 12		50,000–70,000
College Graduate		60,000–90,000+

How does that compare to typical school instruction?

	Words Learned Per Year
Typical vocabulary list (10 words/week)	~360
Strong vocabulary curriculum (15 words/week)	~540
Average vocabulary growth needed	2,000–3,000+
Gap to be filled through reading, conversation, listening, and content learning	1,500–2,500+

Greetings

Would You Rather?

...be observed on the one day your class forgets how to be humans or the one day you forget how to be a teacher?

Would You Rather?

- be stuck in a never-ending **drought** or live under a personal rain cloud that follows you everywhere with constant **precipitation**?
- have your hair permanently in **cirrus cloud** mode (wild and wispy) or **cumulus cloud** mode (big and fluffy)?
- live in a world where it only **freezes** or one where it's constant sticky **humidity**?

Greek and Latin Roots

- Man = hand
- manipulate: operate by 'hand'
- manufacture: make by 'hand'
- manage: lead by 'hand'
- manure: animal fertilizer which is spread by 'hand'
- manicure: taking care of the 'hands'
- Val = value/strength
- Valiant: brave and strong
- Evaluate: judge value
- Equivalent: equal in value/strength
- Validity: quality of value
- Devalue: remove the value
- Valedictorian: Strongest academic

Would you rather...

Be the **valedictorian** but have to deliver your speech with a bad case of food poisoning,

...Or...

take the **equivalent** of a shot glass full of someone else's sweat every day for a week?

Would you rather...

... Get a weekly **manicure** from a raccoon with surprisingly decent skills

...Or...

...Shovel **manure** for an hour each day, but it magically makes your garden grow award-winning vegetables?

Turn, Talk, Create, and Share!

- **Lev** = Lift
- **Levitation**: lifts into the air
- **Elevate**: to raise/lift something
- **Elevator**: a platform that lifts and lowers
- **Lever**: Tool for lifting
- **Alleviate**: Lift the weight off

Words Correct Per Minute

51

Reading pace is considerably slower than the average of 132 WCPM for grade 6. Targeted fluency interventions are recommended.

6

%ile

Reading performance is **significantly below average** compared to grade level expectations.

ORF percentile [↗](#)

87

%

Reading Accuracy

Appropriate Challenge

Reading accuracy shows an ideal learning challenge - not too easy, not too hard. Reading skills can grow while maintaining engagement.

Reading Pace

Slow but Accurate

Careful, accurate reading (87% $\geq$ 70%) with a more deliberate pace. While speed could improve, strong accuracy is a positive foundation.

2.5

/5

Prosody Reading Fluency

EXPRESSIVENESS: 1

RHYTHM: 3

CLARITY: 4

Developing prosody with limited natural elements. The reading may sound choppy or lack appropriate expression.

Reading comprehension Through ReTell

Comprehension assessment shows basic understanding demonstrated, but lacked significant details or was disorganized. Further support in comprehension strategies may be beneficial.

4

%

Self corrections

Very few self-corrections were made during reading. While this may indicate strong reading skills, it could also suggest a lack of engagement with the text and self-reflection.

16

%

Hesitation before 13 words

A moderate number of hesitations occurred. This suggests some challenges with word recognition or comprehension were encountered, impacting fluency.

Think About It!

Cockroach sandwich for my lunch,
Hate the taste but love the crunch!

- Colin McNaughton

CK Poetry

Down the hatch the food will go,
Starting where your teeth all chomp and chew.
Crunch and munch and swish around,
Making tiny bites to travel down!
Your tongue says, "Slide this way!"
The esophagus saves the day.
Slip-sliding like a waterslide ride,
To the stomach deep inside.
The stomach squishes with a squeeze,
Mixing food with acids, if you please.
Gurgle, bubble, slosh, and spin,
Turning food to mush within.
Next comes the small intestine long,
Pulling nutrients right along.
Vitamins, proteins, energy too,
Helping your body grow strong like you!
The liver helps and so does bile,
Breaking fats down all the while.
The pancreas joins the busy crew,
Sending juices bubbling through.
Then the large intestine takes a turn,
Saving water your body can earn.
What is left goes out one day—
That's the digestive system way!

That totally reminded me of something.

We will be back to the normal presentation after this short somewhat connected caveat.

Synergistic Digestion Lesson

- Read a nonfiction book about digestive system (**R&W .70**)
- Determine importance/Critical thinking (**RC .82**)
- Write a summary of learning (**W .82**)
- Connect to your science curriculum on the digestive system to literacy (**V 0.91, RC .40, CK .89**).
- Write a chronological story (**RC .57**) from the perspective of a candy corn being eaten.
- Rehearse and act it out! (**RC.73**)

candycorn

I am a

white orange

and yellow snack.

~~I~~ am called a candy

corn. What was that? Is

Mr. Young picking me up? owl

Mr. Young is chewing me! oh-o!

He swallowed! I went down

he's esophagus! I felt weird.

Then, I went in his stomach.

He made a hole in my forehead!

After that, I went into his small intestine

it was very squishy. After, I went to his

large intestine. It was also very squishy.

Finally, I came out his rectum.

Boredom Negatively Effects Learning ($d = -0.49$)

And we are back.

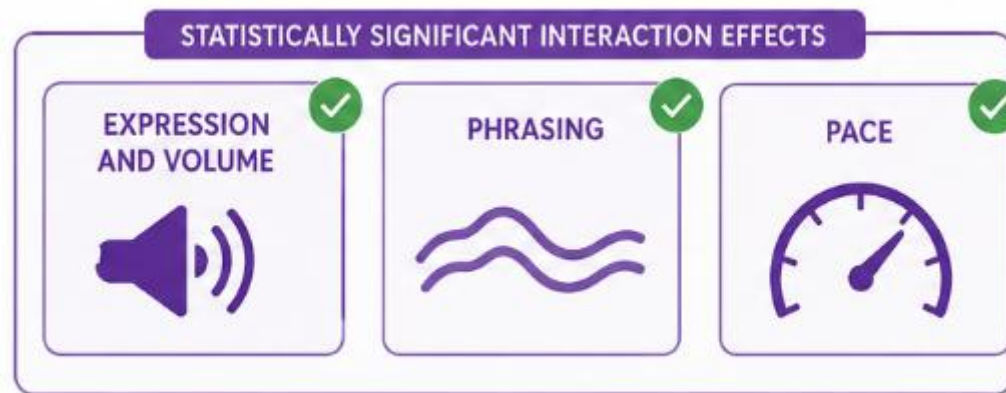

Using performance methods to enhance students' reading fluency
